EDUCATION

Graduation: December 2026

Johns Hopkins University

3.70 / 4.0 GPA

Whiting School of Engineering

Dean's List Student

Majors: Computer Science, Cognitive Science, and Economics

Minor: Environmental Studies

WORK EXPERIENCE

Social Tech Labs | Software Engineering Intern

June 2025 – August 2025, New York, NY

Working under the National Science Foundation's iCAP program tasked with building a less-toxic social experience, with no profiles or 'likes'

- Developed scalable backend services for our app Fzz5 using AWS Lambda, API Gateway, SQS, and DynamoDB
- Built a real-time analytics pipeline with AWS Athena and S3 to track user behavior and drive feature improvements.
- Enhanced AI image generation via AWS Bedrock; wrote backend logic in GoLang within an Agile, microservices environment.

Inbound Careers Inc. | Software Engineering Intern

June 2024 – August 2024, Baltimore, MD

University recruiting platform that connects diverse student organizations directly with employers and recruiters

- Developed a full-stack web app w/ client-server architecture using React & JS for the frontend & Firebase for the backend
- Created student & recruiter portals, facilitating recruiters from Blackstone, Mastercard & Deloitte to reach out to students
- Emphasized platform scalability; adoption by students from 1G universities including Stanford, Northwestern & UCs

Lifetime Fitness Inc. | Facility Operations Team Member

July 2023 – August 2023, West Harrison, NY

High-volume premium fitness club operations role focused on member experience

- Delivered Life Time Exceptional Service through proactive member interaction and problem-solving
- Supervised of all areas of the women's locker room at the highest-membership club across 100+ locations
- Ran a daily execution system including opening/closing checks, cleaning, restock/inventory flow, and incident escalation

SOFTWARE PROJECTS

Daily Grind Café Chain Mobile Ordering App (Android and iOS)

- Entrusted to buildBuilt a cross-platform ordering expo app, leveraging Firestore for real-time order/inventory management
- Integrated the JHU credentialing system for SSO for the 3 campus locations, enabling use of dining dollars in meal plans
- Consolidated 93 campus locations into one app, supporting unique menus and operations

GreenGauge Eco-Friendly AI Model Selector

- Tuned a scikit-learn Random Forest (token counts, POS ratios, norms) with GridSearchCV; raised accuracy to 94%.
- Built a React + Mapbox GL JS dashboard showing EPA grid data with filters and time-series charts.
- Set up nightly GitHub Actions to retrain models, run pytest, deploy FastAPI (AWS Lambda), and update MongoDB.
- Wrote Swagger UI docs, maintained Notion roadmaps; won "AI for Change" Grand Prize for carbon-cost tool.

TECHNICAL SKILLS

Languages | Python, SQL, MATLAB, Java, Swift, C, C++, C#, CSS, Javascript, HTML

Technologies | MS Office Suite, React, Unity, Xcode, VS Code, Android Studio, Photoshop, Illustrator, Blender, Node

Courses | Object Oriented Software Engineering, Data Structures & Algos, Artificial Intelligence, Web Security, Human-Computer Interaction, The Ethics of AI and Automation, Computer Systems, Full-stack Javascript, Calculus I & II, Physics, Machine Imagination, Chemistry, Professional Writing and Communication, Neurolinguistics
